

Microsoft Copilot: kaip suvaldyti organizacijos lygmeniu?

Rimas Kareiva

Skaitmeninių darbo vietų kompetencijų centras

Centro vadovas

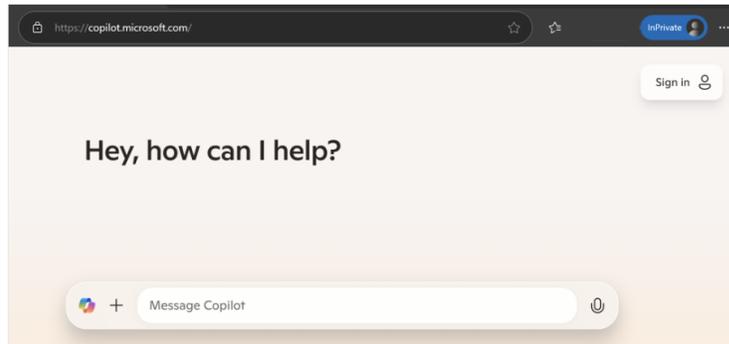

Microsoft Copilot

- ✓ Use for personal tasks
- ✓ Free consumer version

Microsoft Copilot is a consumer version and is available for free. It can help you with personal tasks and uses information from the internet. You can use it for nonsensitive work tasks, but be cautious. Never add sensitive or proprietary work information in a prompt.

When you open Microsoft Copilot, it looks similar to the following image:

Microsoft 365 Copilot Chat

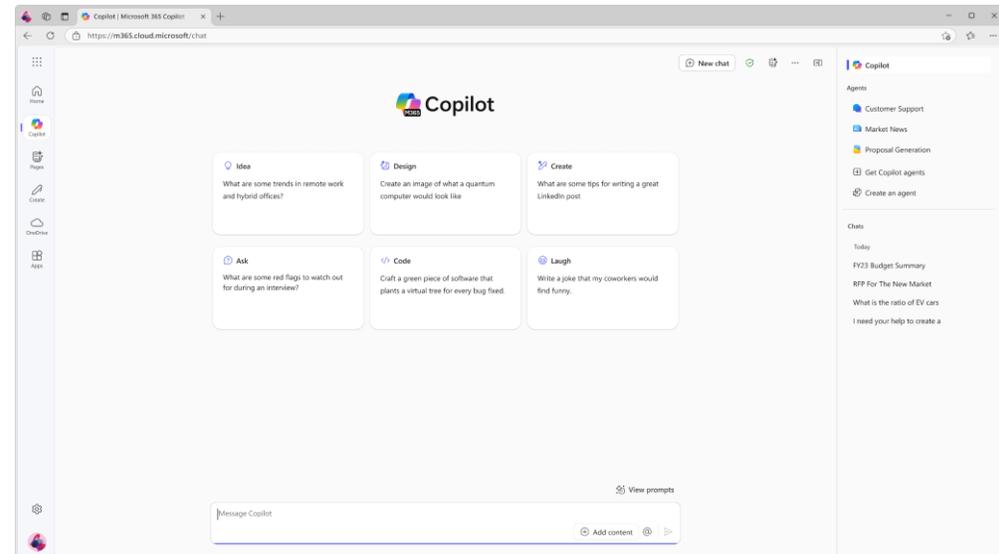

- ✓ Secure with [enterprise data protection](#)
- ✓ Scalable with [pay-as-you-go](#)
- ✓ Free to organizations with a Microsoft 365 license

Microsoft 365 Copilot Chat is an AI prompt and response experience that's [grounded in the web](#) and powered by [large language models \(LLMs\)](#).

It's free to organizations that have a Microsoft 365 license. With Copilot Chat:

- You can also create images and use [Copilot Pages](#) to save, edit, and share AI-generated content.
- You can use for work and education, and know that you're protected with [enterprise data protection](#).
- You can manage it using [IT controls for admins](#).

Microsoft 365 Copilot Chat is available on the web at <https://m365copilot.com>, in the [Microsoft 365 Copilot app](#), and in Teams, Outlook, & Microsoft Edge.

Microsoft 365 Copilot

- ✔ Use for work tasks
- ✔ Licensed by your work organization
- ✔ Use for personal tasks, with caution. This Copilot accesses work data.
- ✔ Personally licensed by end users

Microsoft 365 Copilot is licensed by your work organization. It includes features that can help end users and admins with work tasks, like:

- Use Microsoft 365 Copilot Chat for web-based (internet) and work-based (Microsoft Graph) chat.
- Get in-app experiences in your Microsoft 365 apps, like Teams, Word, Excel, PowerPoint, and Outlook.
- Create Copilot Agents.
- Measure insights with Copilot Analytics.

Feature	Description
Copilot in Word	Copilot in Word transforms your writing with efficiency and creativity – create, summarize, comprehend, refine, and elevate your documents. Now you can use enhanced capabilities like visualizing and transforming text into a table. Some other capabilities also include drafting a document by referencing documents and discovering information about your document.
Copilot in PowerPoint	Copilot in PowerPoint helps you turn your ideas into stunning presentations. As your storytelling partner, Copilot can transform existing written documents into decks complete with speaker notes, and sources or start a new presentation from a simple prompt or outline. Summarize lengthy presentations with the click of a button and use Copilot to organize your presentation.
Copilot in Excel	Copilot in Excel unlocks Excel's full capabilities so you can achieve your goal - from creating a simple spreadsheet to conducting advanced data analysis. Create and prepare data easily with Copilot as it helps you build a tailored spreadsheet. Extract key insights and trends so you can act on your data more effectively. And share insights easily with others including visualizations to communicate your data.
Copilot in Outlook	Copilot in Outlook helps you stay on top of your inbox and facilitate impactful communication. Now you can ask Copilot to draft and summarize emails and can quickly jump to the source of the summarized content and use chat to answer questions and complete tasks.
Copilot in Teams	Copilot in Teams enables AI-based communication and collaboration, helping you focus on what matters most. Copilot can recap conversations, organize key discussion points, and summarize key actions – or answer any questions you have about the chat, meeting, or call. Copilot can also act as your personal writing assistant, drafting messages in the tone that best suits your needs. Whatever your collaboration needs, Copilot can help save time and unlock your creativity.
Copilot Prompt Gallery	Copilot Prompt Gallery helps users start their AI journey with confidence and take greater advantage of Copilot in their daily work. Explore the curated selection of Copilot prompts, save and share your favorite ones, and find prompting inspiration from others.
Copilot in Microsoft Stream	Copilot in Microsoft Stream helps you get the information you need from any video with a transcript within seconds. You can use Copilot in Stream to provide a summary of the video, answer specific questions, quickly jump to specific topics or points of discussion, and identify calls to action.
Copilot Whiteboard	Copilot in Whiteboard helps you kickstart and accelerate your ideation process to generate, categorize, and summarize your ideas.
Copilot OneNote	Copilot in OneNote helps you create, capture, organize, and recall information with confidence. As your note taking partner, Copilot uses your prompts to draft plans, generate ideas, create lists, organize information, and more.
Microsoft Copilot Dashboard	The Copilot Dashboard provides visibility into Copilot usage, adoption, and impact.
Agents in SharePoint	Turn SharePoint sites and documents into scoped agents for specific needs, projects, or tasks. Every site includes a ready-made agent, or users can create their own customized agents based on files, folders, or sites they choose. They can also share the agent to a Teams chat or meeting.
Copilot in SharePoint	Build new SharePoint pages in minutes using pre-built templates or custom prompts with Copilot. Use documents as data sources to help Copilot create a site tied to your content and information. Use Copilot to auto-rewrite text on the page to quickly create engaging content.
Copilot in OneDrive	Copilot in OneDrive allows you to gain quick insights on content within your File Explorer. Easily hover over a single file or choose multiple (up to 5) to summarize, compare, or ask questions—all without having to open them.
Microsoft 365 Copilot Usage Report	Microsoft 365 Copilot usage reports allow administrators to view a summary of how users adoption, retention, and engagement are with Microsoft 365 Copilot.
Microsoft 365 Copilot Chat	Copilot Chat is a secure, enterprise-ready AI chat powered by broad web knowledge and the latest LLM models. It includes access to web-grounded agents at no additional cost for commercial users with a Microsoft 365 license. Agents grounded in shared tenant work data are available on a consumption basis. The Microsoft 365 Copilot app serves as the starting point to chat with Copilot in the flow of work. Additionally, Copilot Chat is accessible in Microsoft Teams, Outlook, and the Edge sidebar. Agents are coming soon to both the Web and Work tabs of Microsoft 365 Copilot Chat in Outlook for the Web and the new Outlook for Windows.

Power Platform

Define the ways people can use generative AI features across their Power Platform and Dynamics 365 products.

- Copilot feedback** TENANT-LEVEL
Control whether people can submit feedback about Copilot to Microsoft, which helps improve Copilot.
- Generative AI Settings**
Allow usage of AI in Power Platform products.
- Preview and experimental AI models**
Let people use AI models that are experimental or in preview to make agents, prompts, apps, flows, and more in Copilot Studio, Power Apps, and Power Automate.
- AI prompts**
Control whether people see prebuilt and custom prompts when they use generative AI.
- Enable xAI models** PREVIEW Disabled in Microsoft 365 admin center
Allow makers to use xAI models when building agents in Copilot Studio.
- > External models

Copilot Studio

- Computer Use**
Enable usage of Computer Use feature in Copilot Studio. AI automates interactions but may cause unintended actions that compromise device, data, or account security.
- Entra Agent Identity for Copilot Studio** PREVIEW
Enables new Copilot Studio custom agent to use Entra Agent Identity.
- Code generation and execution in Copilot Studio**
Enables code generation and execution in Copilot Studio.
- Connected Agents Copilot Studio** PREVIEW
Enabling Copilot Studio agent to invoke another agent
- Hosted Browser in Copilot Studio** PREVIEW TENANT-LEVEL
Hosted browser enables computer use to run a Microsoft-hosted browser with internet access and web automation support. By using this feature you consent that your data will flow to Windows 365 which operates outside the Azure compliance boundary.
- Knowledge sources for agents**
Choose which types of knowledge sources agents can reference.
- Agent access channels**
Control where someone can access and use a published agent.
- Skills in agents**
Let agents use other agents to help navigate topics.
- Client application access control**
Help prevent data exfiltration.
- Authentication for agents**
Restrict access to agents published from Copilot Studio to help keep data secure.
- Sharing**
Control how widely items can be shared.

Overview

Details

Group: Default Group | Template: AI Baseline

Created: 25/2/2026 | Status: In progress

About

The AI Baseline Template is a unified control framework developed by merging four globally recognized standards—ISO/IEC 42001, ISO/IEC 23894, NIST AI Risk Management Framework, and the EU AI Act—each contributing distinct properties to ensure comprehensive coverage of AI governance, risk management, and compliance. This consolidated baseline provides structured controls across domains such as governance, data management, design, deployment, and oversight, enabling organizations to implement responsible AI practices aligned with international regulations and ethical principles.
