ATEA

Ateia MDR/MXDR Service

24/7/365 monitoring and analysis of Defender alarms – ensured by Ateia SOC

Correct configuration in the tool/platform – ensured by MES service

Continuous configuration updates

Proactive and automatic actions

Option: IRT

What is MDR?

MDR is a functionality offered under Atea MDR/MXDR service to ensure the following:

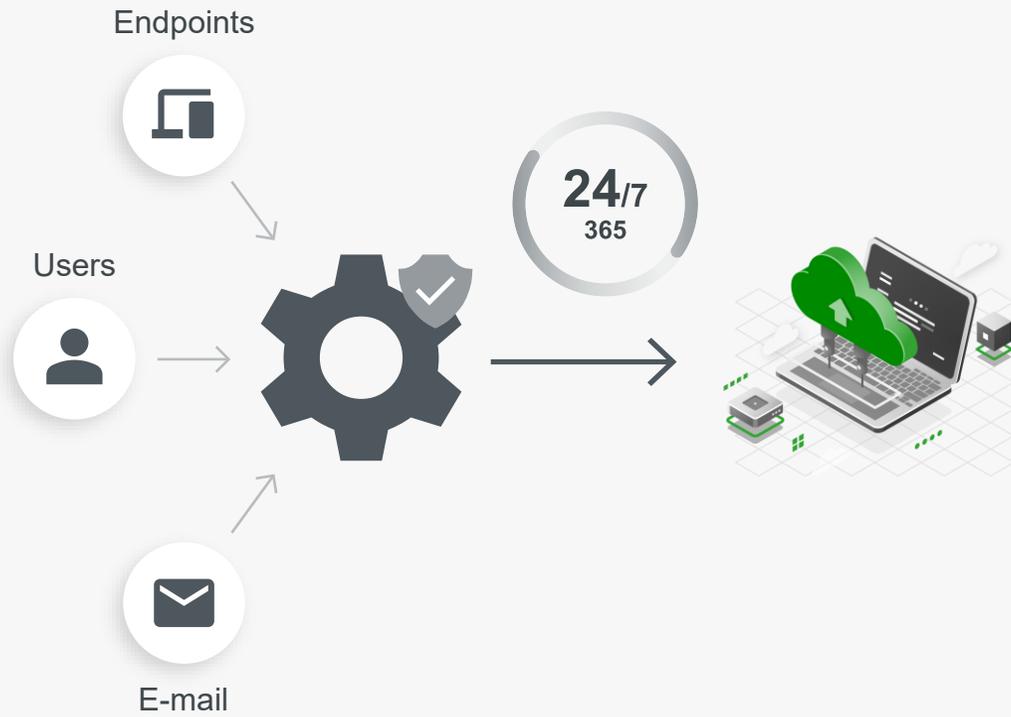

- ✓ 24/7/365 monitoring of alarms arising from **three detection sources** – Defender for Endpoint (MDE), Defender for Office 365 (MDO) and Microsoft Entra ID
- ✓ The delivery happens in the customers Azure Sentinel platform, which is used as SIEM
- ✓ MDR has no use cases offered
- ✓ Managed Endpoint Security (MES) provides Defender configuration under that service's own pricelist and delivery lifecycle
- ✓ MES is a crucial component in MDR. MES is included in MDR pricing by default
- ✓ Daily delivery is ensured by Atea SOC

What is MXDR?

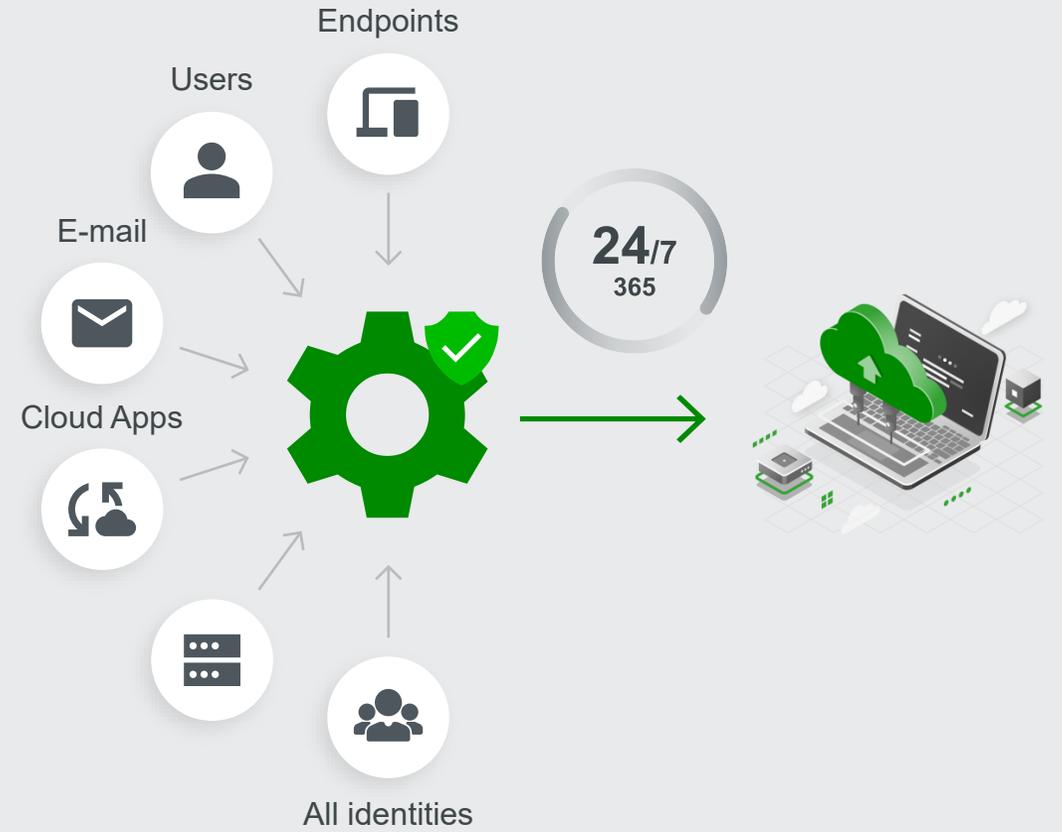

MXDR is a functionality offered under Atea MDR/MXDR service to ensure the following:

- ✓ 24/7/365 monitoring of alarms arising from **six detection sources** – Defender for Endpoint (MDE), Defender for Office 365 (MDO), Defender for Identity (MDI), Defender for Cloud Apps (MDCA), Defender for Servers (part of Defender for Cloud workload) and Microsoft Entra ID P2
- ✓ The delivery happens in the customers Azure Sentinel platform, which is used as SIEM
- ✓ MXDR includes 185 use cases configured in Azure Sentinel
- ✓ Managed Endpoint Security (MES) provides Defender configuration under that service's own pricelist and delivery lifecycle
- ✓ MES is a crucial component in MXDR. MES is included in MXDR pricing by default
- ✓ Daily delivery is ensured by Atea SOC

Managed Endpoint Security (MES)

MXDR

SOC+

Security Service Comparison (simplified)

Category	MES	MDR	MXDR	SOC+
Value	Security policy configuration, endpoint hardening, product maintenance	Security incident monitoring	Security incident monitoring & threat hunting	Security incident monitoring, threat hunting, security advisory, IRT
Monitoring scope	EDR=MDE XDR=MDE, MDO, MDI, MDCA & Entra ID	MDE, MDO, Entra ID	MDE, MDO, MDCA, MDI, Entra ID, Defender for Servers	All log sources in MDR/MXDR + custom log sources
Incident Response	08-17 business hours	24/7/365 SOC monitoring of MDE, MDO, Entra ID incidents	24/7/365 SOC monitoring across Defender stack	24/7/365 SOC monitoring across all environment
Custom Detection Rules	No	No	Yes, 180+ rules Detection-as-Code in Sentinel	Yes, tailored to customer environment
Supported log sources in Sentinel	Not applicable	MDE, MDO & Entra ID logs	All Microsoft Defender modules (incl. Servers) and Entra ID	Any log source (Defender, third-party firewalls, Kubernetes, etc.)

Service Offering Tiers

Standard

MDR (9-13 EUR/device/month)

24/7/365 monitoring ensured by Atea SOC
Protects end users and endpoints against threats. This tier includes the following product configuration, management and alarm handling:

Microsoft Defender for Endpoint

Microsoft Defender for Office 365

Entra ID

Microsoft Sentinel

Plus

MXDR (12-15 EUR/device/month)

24/7/365 monitoring ensured by Atea SOC
The advanced offering that includes protection of end users, endpoints, email, cloud applications, all identities and servers. Protects against organization-wide threats by combining:

Entra ID

Microsoft Defender for Cloud Apps

Microsoft Defender for Endpoint

Microsoft Defender for Identity

Microsoft Defender for Office 365

Microsoft Sentinel

Premium

SOC+

24/7/365 monitoring ensured by Atea SOC
The premium offering includes all MDR and MXDR capabilities, as well as support for firewalls, Kubernetes clusters, and other custom log sources as required by the customer.

Based on - 200 devices / 24 months agreement
